

*Little Oakley Parish Council  
Clerks Report  
August and September 2020*

**Playground Bench** – this has now been delivered

**Remote Meetings survey** – the survey asked how Parish Councils were managing with remote meetings which I replied that we were managing well and have no problems. Also these will carry on until we are able to meet in person.

**Lamp Post Notices** – the quote per lamp post is £20 which includes installation. There is no difference to the cost if we have light number, LOPC and any contact number printed or just the light number on the notice

**Fly Tipping** – a resident called to advise items had been left inside his garage and was concerned all the keys to the block of garages on Bay View Crescent were the same. TDC were contacted and they were due to inspect the area that day. They were going to contact the resident after the view and although all the locks are different they were going to offer to replace this for him.

**Unlit Street Light** – this was reported as the resident could not find out who owned the light. They had contacted ECC and TDC. I have had a look and reported the light to ECC. This is near the public footpath on Bay View Crescent.

**Software Problems** – Excel has been causing problems with the Cashbook spreadsheet so this has now been moved to Google sheets. The budget spreadsheet hasn't been affected. The scanner is not working at present but I will look at setting it up from scratch again but if it still doesn't work I will call the computer engineer we used and have him look at this.
